HardState University Index · 2026-11

3,793 universities in 55 countries; 1,897 assessed and ranked within their country. The full dataset, with the evidence for every criterion, is at hardstate.net/university-index and in the CSV and Excel files published with this report (CC BY 4.0).

Method

Edition 2026-11 (first edition). Published at app.hardstate.net/index, with the dataset and a report to download.

The HardState University Index measures two things anyone can check from the outside: **whether a university's degrees can be verified by a third party without asking the university**, and **how much the university publishes about itself**. It does not rate teaching, research or reputation.

Principles

1. **Observable facts only.** Every criterion is a fact a reader can check on a public page. Each result links to the pages it was read from and carries the date it was checked.
2. **"Not found" is not "does not exist".** A criterion with no public evidence scores 0 and says *not found*. A university that has not been reviewed yet is listed as *assessment pending* and is not ranked.
3. **Neutral.** No criterion depends on a vendor. A national system (SEP, MEC, HEDD, My eQuals, OpenCerts…), a commercial provider or the university's own tool all count the same. Using HardState earns no points.
4. **Correctable.** Any university can send evidence we missed (hello@hardstate.net); corrections are applied in the next update and listed in the changelog.
5. **Open.** The method is public and the dataset is published under CC BY 4.0.

Criteria and weights (0–100)

Pillar	Criterion	Points	Counts when
V · Verifiability (50)	V1 Public verification of degrees	20	A third party can check a degree online, free, without an account (portal, QR, or a national service the university takes part in)
	V2 Digital degree	15	The university issues degrees or official certificates as signed digital originals (not scans)
	V3 Open-standard credentials	15	It issues credentials in an open, verifiable format (Open Badges, Europass Digital Credentials, W3C Verifiable Credentials, Blockcerts or similar)
T · Transparency (40)	T1 Transparency portal	15	Its own public portal with budget, contracts or governance information
	T2 Open data	10	It publishes datasets in open, reusable formats
	T3 Integrity framework	10	It publishes an ethics or integrity code, an integrity body, or a reporting channel
	T4 Independent evaluation	5	A published evaluation of its transparency by an official body or an independent third party
D · Digital services (10)	D1 Online records	10	Students and graduates can request and receive certificates or transcripts online

Each criterion is **met** (full points), **partial** (half: limited to some programmes, a pilot, or only via a national service without the university's own page) or **not found** (0).

Rules that apply everywhere:

- V1 needs verification that is free and needs no account. Services that charge the verifier or need registration (HEDD in the UK, the National Student Clearinghouse's DegreeVerify in the US, Moahal in Saudi Arabia) don't count unless the university also has its own free verification page.
- V2 needs a signed digital original. A paid electronic copy of a paper degree (Spain's "eTítulo") counts as partial.
- A national service the university takes part in, with no page of its own, counts as partial (SEP/DGP, My eQuals, MyCreds, OpenCerts, UAE PASS, Taiwan's dcert…). Membership of a consortium or a pilot network is not issuing credentials.

Score bands: Leading ≥ 65 · Advancing 40–64 · Emerging < 40. Ranked within each country; the global table is shown for reference, since transparency obligations differ by country.

Detail pages: a university has a page of its own when there is evidence on three or more criteria and at least two of them link to the page that proves it; a country, when it has three or more such universities. Every assessed university is still in its country's table and in the open dataset.

What is not measured

Fraud cases, accreditation, rankings of academic quality, prices and anything about whether a university is a customer of anyone. Fraud cases inform our research but are never scored: a university that reports fraud should not look worse than one that hides it.

Results by country

Argentina

147 universities listed, 77 assessed. The others are pending assessment.
